

# Protect your commercial central heating system with

# MagnaClean<sup>®</sup> Industrial

**TACKLES  
IRON-OXIDE  
FAST**

ADEY Professional Heating Solutions now brings you *MagnaClean Industrial*<sup>®</sup>, an incredibly powerful magnetic filtration unit designed to tackle demanding industrial and commercial applications.

The installation of this proven technology combines exceptional design and precision engineering to deliver immediate benefits wherever there is a significant number of radiators with larger dimension pipework:

- **Guaranteed central heating system protection from sludge**
- **Simple, trouble-free installation & servicing**
- **Improved central heating system performance & efficiency**
- **Extended operational life of the system**
- **No ongoing running costs**
- **Low maintenance costs**

There is currently no comparable product on the market for professional heating engineers to address this issue within heavy-duty commercial, industrial, health, leisure, educational and residential environments.

To benefit from a more powerful commercial central heating system solution, ask your supplier about *MagnaClean Industrial* TODAY or call 01242 233702 NOW

## **MagnaClean Industrial operates in two ways**

1. It purges even the most demanding and dirtiest commercial system of the potentially damaging iron-oxide.
2. The ongoing operation of the heating system is trouble-free as the water circulates through what is effectively a 'protected' iron oxide-free zone.
