

AQUASNAP PLUS
Reversible

Chillers/Heat pumps

30AW

Carrier's new range of inverter driven R410A Aquasnap PLUS air-to-water chillers/heat pumps delivers high performance in both heating and cooling.

- DC inverter twin-rotary compressors
- Precise microprocessor control
- Leaving water temperature up to 60°C and as low as 4°C
- Variable-speed fans with innovative patented fan blade
- Available with an integrated hydronic module, reducing space requirements and simplifying the installation
- Compatible with all Carrier fan coil units
- Ideal for underfloor heating and low-temperature radiator applications
- Wide operating range in both heating and cooling mode offering high performance in a wide temperature range
