

Noise and vibration control equipment, air filters, weather and acoustic louvres

EMTEC Products Ltd offers a comprehensive service in the analysis, design, manufacture and installation of noise and vibration control solutions, air filter products, external louvre systems and acoustic louvres and screens.

Silencers

EMTEC absorptive duct silencers are used to reduce fan noise, provide speech privacy or prevent external noise from entering a building.

EMTEC RAAC silencers attenuate a plantroom discharge

Acoustic panel enclosures and doors

EMTEC PAC acoustic panels are used extensively in industry to create modular acoustic enclosures around noisy equipment and can be easily installed and demounted. EMTEC specialises in the design, fabrication and installation of one piece, single lift acoustic enclosures. These include all the necessary silencers and DAC acoustic doors.

EMTEC PAC 40 – one piece enclosure

Anti-vibration mountings and inertia bases

VMC range of neoprene and spring AV mountings

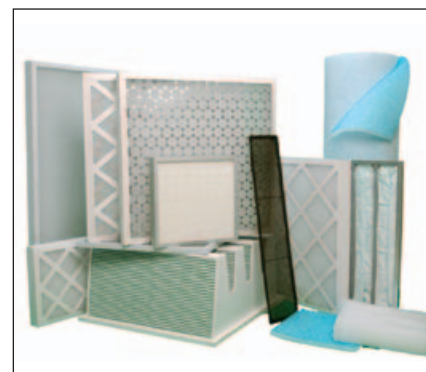

EMTEC markets the VMC and Korfund ranges of anti-vibration mountings. Static deflections of between 2mm and 250mm are available and loads of between 10kg and 10,000kg can be supported off a single mounting.

LAAC 15 and LAAC 30 acoustic louvres

EMTEC LAAC acoustic louvres provide attenuation whilst occupying minimal usable space and form an aesthetically pleasing external barrier.

EMTEC LAAC 15 acoustic louvred screen around chillers

EMTEC air filter range

Air filter products

EMTEC offers an extensive range of air filtration products suitable for all applications in the heating, ventilating and air-conditioning industries and has been manufacturing filters in its factory for over 35 years.

Weather louvre systems

EMTEC WLAC type weather louvres combine clean lines with low air resistance and effective weathering.

EMTEC WLAC 75 (AL) plantroom discharge louvre
